

## Temperature/Pressure Limits - Plasson Compression Fittings

| Temperature (°C) | Max Service Pressure (Bar) | Expected Service Life (Years) |
|------------------|----------------------------|-------------------------------|
| 20               | 16.0                       | 50                            |
| 25               | 14.6                       | 50                            |
| 30               | 13.2                       | 50                            |
| 35               | 12.0                       | 50                            |
| 40               | 10.7                       | 50                            |
| 45               | 9.6                        | 50                            |
| 50               | 8.5                        | 25                            |
